

Planting Forest Trees

At a glance...

Training (Only)

Duration Notes:	1 Day
Delivery Method:	Classroom and practical
Prerequisites:	It is recommended that all learners have completed the Emergency First Aid certificate.

Introduction

This course is aimed at anyone employed in planting forest trees, particularly where those trees have been chemically pre-treated.

Overview in brief

The Lantra Planting forest trees course covers all aspects of planting trees for commercial forestry.

At the end of the course you will receive a certificate of attendance.

This is a hands-on course that delivers both practical skills and health and safety guidance as well as demonstrating that you and your employer have completed sufficient training to meet the Provision and Use of Work Equipment Regulations 1998 (PUWER).

The finer details

This course covers how to safely carry out the commercial planting of trees with theory sessions covering the health and safety implications of working with chemically planted trees, biosecurity and relevant legislation.

As well as classroom time you will be taught the practical techniques used when planting trees by a highly skilled Lantra approved instructor.

Who should attend?

This course is designed for anyone employed in planting forest trees, particularly where those trees have been chemically pre-treated.

What will be covered?

By the end of this course you will be able to:

- Understand biosecurity
- Legislation that affects pesticide use relating to planting forest trees
- Environmental considerations
- Preparing for planting trees
- Planting techniques for trees
